Bone is 10 cm / 4" long

Materials:

– Any worst weighted yarn in green, black, white, cream, grey, orange and blue
– Hook G-6 (4mm)
– Needle for joining parts
– Polyfill for the filling
– pins
– 1 small button 0.8 cm / 0.3" diameter

Abbreviations (USA):

ch: chain
sc: single crochet
st: stitch
sl st: slip stitch
sc2tog: single crochet 2 together
rnd: round

Notions

This pattern will require some yarn changing and I would like to explain how I usually do it. When I say "change yarn", I would do it in the stitch before, pull up the first loop for a single crochet in the old color, then, pull the new color through the last two loops to complete that single crochet. See in the picture below.

Dog Assembling

Weave in all ends that won't be used for attaching.
With the needle, blue yarn and black yarn, stitch eyes and nose. They should be 3 rounds apart and the eyes should be 3 stitches apart. The nose will be right in the middle towards the upper part.
Now, flatten the ears and attach them to the head. I stitched them 2 rounds from the eyes and 6 stitches apart.
Stitch arms, legs and tail according to pictures.

Bike Assembling

Let's start with the handle bar "paw holders". With the black yarn, join with a sl st to the 2nd round on the tip of the bar. See picture.
Ch 6 and sl to the opposite side where you joined. Weave in ends. Repeat to the other side.

A tip: Use the pins to position parts in place so have a better idea where to attach them.

Now attach, the mudguards/ fenders to the tyres.

Next attach the cylinder to the engine.

Stitch front handles to the tank. See picture. They should stick a little bit up, so we can attach the handle bar later. Also the open part of the bar "looking up".

Now attach one tyre to the front handles.

Attach engine/ cylinder combo to tank. Start stitching it to the 10th round of the tank.

Attach tip of the tank to back tyre.

Next, back bars to tyres and then bars to tank.

Next, seat should be flatten, opening should be closed. Then attach it between the tank and the back tyre.

For the chain that goes from the engine to the back tyre, with grey yarn, join with a sl st to the top of the engine. Ch 22. Go around the connection between back tyre and back bar and st st to the bottom tip of engine.

Headlight should be attached to the front of the tank.

Attach sidecar tyre to sidecar.

Attach button to back bar.

Attack handle bar to front bars. (use the pins to find the right angle)

Ribbon around bone and we are ready to roar around! And don't forget your helmet!
